

Touch Desk Sample Income Report

The following pages contain a sample income report generated by Touch Desk.

Note that this is a sample only, the figures are meaningless.

Touch Desk income reports have many setup and configuration options, and this sample illustrates only one typical setup.

The items included in this report are also samples, they may not represent what would actually be used.

All data can be exported for use in other programs, for example to plot graphs in Excel.

Financial data can also be exported to Quickbooks Accounting, where it can be combined with other financial data to provide a complete accounting and reporting solution for the center.
